PROFILE SUMMARY

Informatics Engineering student with hands-on background in Linux infrastructure and DevOps — Kubernetes, Docker, Ansible, OpenStack, Ceph, GitLab CI/CD, and ELK Stack. 2nd Place at LKS Cloud Computing Provincial Competition, South Kalimantan 2023. Actively building projects in DevOps, WebGIS, and AI/RAG systems.

EXPERIENCE

DevOps Engineer (Freelance) – PT Tepak Kreasi Digital • 2024 • Remote

- Set up Ubuntu 22.04 VPS for Next.js deployment; configured Nginx reverse proxy + SSL/TLS via Let's Encrypt + Cloudflare.
- Built GitHub Actions CI/CD pipeline for automated deployment via SSH; process management with PM2 and GitHub Secrets.
- Security hardening: ZAP Scanner + HTTP security headers (HSTS, CSP, X-Content-Type-Options).

Student Intern – DevOps & Cloud Infrastructure – PT Boer Technology (Btech) • Jan 2024 – Apr 2024 • Remote

- Completed 9 structured training modules: Linux Admin, Docker, Kubernetes, GitLab, Ceph, OpenStack, ELK Stack, Prometheus, Ansible.
- Hands-on lab practice for each module including setup, configuration, and troubleshooting; produced technical documentation on GitBook.

PROJECTS

GeoKafe BJB | 2026

- Single-file WebGIS app mapping cafes in Banjarbaru & Martapura. Stack: Leaflet.js, Chart.js, Tailwind CSS. Live: deadyiss.github.io/geokafe-bjb

PrivaQuery | 2026

- RAG-based document Q&A system with AI hallucination detection. Stack: Python, Flask, Groq API (LLaMA 3.1), SQLite, GitHub Actions CI/CD.

SiMawa | 2026

- Student information system built on Laravel 12 + SQLite. Features: CRUD, PDF/CSV export, student card printing, dark mode. github.com/deadyiss/dashboard-simawa

EDUCATION

Bachelor of Informatics Engineering

Universitas Islam Kalimantan Muhammad Arsyad Al Banjari (UNISKA MAB) • Sep 2024 – Present (Est. 2028)

Computer and Telecommunication Network Engineering

SMK Negeri 2 Banjarbaru • 2021 – 2024

- 2nd Place – LKS Cloud Computing Provincial Competition, South Kalimantan 2023

TECHNICAL SKILLS

Infrastructure & Cloud: Linux, OpenStack, Ceph, AWS Cloud Foundations, KVM

Container & Orchestration: Docker, Kubernetes

CI/CD & Automation: GitLab CI/CD, GitHub Actions, Ansible

Monitoring & Logging: Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana)

Networking: MikroTik (MTCNA), Nginx, Cloudflare, TCP/IP

Programming: Python (Flask, RAG), Bash, PHP, HTML/CSS/JavaScript

Security: OWASP Top 10, SQL Injection, XSS, Security Testing, ZAP Scanner

CERTIFICATIONS

Cybersecurity for Web Application Bootcamp • Nusacodes • May 2026

MTCNA – MikroTik Certified Network Associate • MikroTik • Sep 2023 – Sep 2026

AWS Academy Graduate – Cloud Foundations • AWS Academy • May 2023
